

## Deployment Statistics

Lasted a total of 7 days

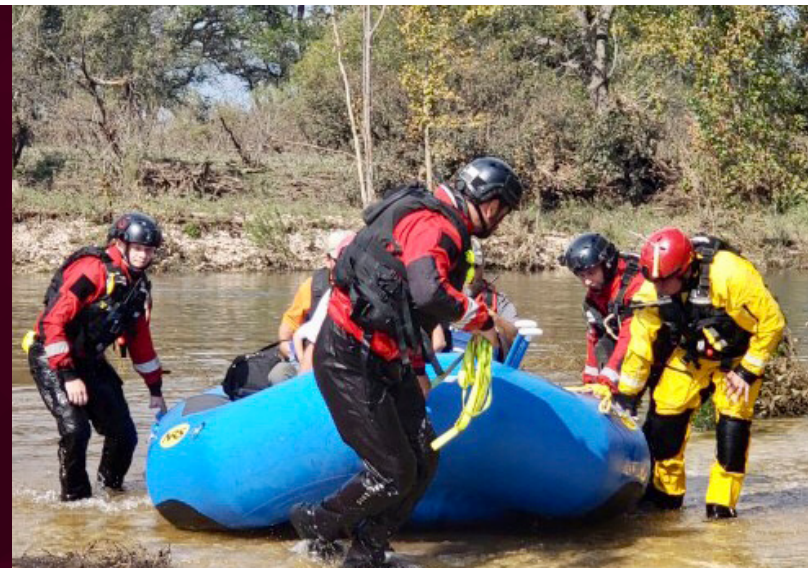

62 Personnel activated supporting the following resources:

- 6 Water Rescue Squads
- 1 Search Team
- 6 Helicopter Search and Rescue Technicians

Teams completed:

- 16 Evacuations
- 4 Shelter-in-place

Type - **RAIN**

On October 7, 2018, heavy rain in west and central Texas resulted in catastrophic flooding along the Llano River, near Junction, Texas. Heavy rains overnight caused the Llano River to rise from less than 2ft in depth to over 20ft within an hour. An RV park near the river was impacted, and several people were reported missing.

On October 8, TX-TF 1 deployed Water Rescue Resources and 2 Search Mission Ready Package, one from TX-TF1 and one from TX-TF2. The Search MRP's continued to assist in searching the river banks for the known missing person, and for another other persons that might have been swept away by the historic flash flood event.

TX-TF1 provided assistance along the Llano River area performing rescues, evacuations, and thousands of shelter-in-place welfare checks. All TX-TF1 resources and personnel were demobilized and returned to their home stations on October 14.
